

## Subject Index

- Abortions and the primary sex ratio, sex chromatin, 134
- Age, pregnancy, parity, race and hormonal condition, incidence of carcinoma *in situ* with special reference to, 179
- Anaplasia and carcinoma *in situ* by differential cell counts, diagnosis of, 343
- Animal experiments, experimental carcinoma *in situ*, 157
- Animal kingdom, sex chromatin, its discovery and variations in, 1
- Animals, experimental, malignant cells in the peripheral blood of, 143
- Asbestosis associated with bronchogenic carcinoma, primary cytologic diagnosis of, 391
- Atrophic epithelium, the effect of progestogens on the, 231
- Cancer cell detection by cytological methods, a comparative study of the accuracy of, 508  
of the ovary, vaginal cytology in, 496
- Cancer cells, circulating, a simple method for identification of, 273  
in wound washings, an evaluation of the characteristics of, 335
- Cancer, cytologic detection of, considerations for its future. Papanicolaou and acridine-orange technic, a comparative examination of, 468  
lung, superheated aerosol induced sputum in the cytodiagnosis of, 405  
of the uterine cervix, the morbidity-mortality paradox in, 161
- Carcinoma, bronchogenic, primary cytologic diagnosis of asbestosis associated with, 391  
early, of the cervix, pregnancy and fertility, exfoliative cytology in, 517  
of the lung, the presence of malignant cells in the blood of patients with, 314
- Carcinoma *in situ*, advantages and disadvantages of irradiative management of, 171  
and tissue culture, 159  
anatomical distribution of, 207  
conservative management of, advantages and disadvantages of, 163  
I. Clinical viewpoint, 164  
II. Pathologist's viewpoint, 165  
differentiation of, cytological picture versus the histological grade of, 208  
do surgical procedures on cervixes increase the incidence of postoperative invasions? 199  
in other sites, cervical carcinoma *in situ* as compared with, 201  
latent period of, 191  
management of, advantages and disadvantages of radical surgery, 170  
of the cervix uteri, is squamous metaplasia a precursor of? Jewish and non-Jewish women, a study of, 177  
probable percentage of regression of, 195
- Cells, abnormal, in the peripheral circulation of patients with lung cancer, a study of, 319  
in suspension, physical methods in the control of, 385  
some interpretations of differentiative behavior of, 400
- Cellular modulation, experimental studies of, 399
- Cervix, uterine, colpomicroscopy of anaplasia (dysplasia) and carcinoma *in situ* of the, 403
- Colon pathology, cytological field patterns and nuclear morphology in the diagnosis of, 325
- Cul-de-sac aspiration, screening for ovarian cancer by, 492
- Cytoanalyzer, further development of the, 238  
further development and evaluation of the, 423  
technological progress of the, 417
- Cytological diagnosis, primary, carcinoma *in situ* of the uterine cervix as the, 155  
smears in regard to progestational effects, terminology of, 280  
studies, a new method using a double lumen tube to obtain esophageal and gastric washings for, 332
- Development of screening, diagnostic and research cytology at Memorial Sloan-Kettering Cancer Center, Dr. Papanicolaou's role in the, 487
- Differentiative behavior of cells, some interpretations of, 400
- DMBA, benzo(a) pyrene and tobacco tar, cytopathological changes of the uterine cervix. Syrian hamsters after painting with, 376
- Early invasive carcinoma (microcarcinoma) may one treat it less radically than the more extensive invasive carcinoma? 173  
mouth cancer, oral exfoliative cytology for detection of, 355  
primary malignant melanoma of the vagina, the exfoliative cytology and histogenesis of an, 245
- Embryonic and fetal tissue, sex chromatin in, 61
- Endometrial carcinoma, result of ten years' experience, cytologic diagnosis of, 519
- Epidermal cells, human, mineral changes in maturation and ageing of, 401
- Estradiol-benzoate and 20-methylcholanthrene, neoplastic changes in cervix uteri following administration of, 267
- Evaluation of sex chromatin in oral smears and peripheral blood specimens, discrepancies in the, 103
- Fungus diseases of the lung, exfoliative cytology in, 413
- Genital tract, female, immunochemical study of plasma proteins of, 340
- Hormonal cytology, a summary of the writings of George N. Papanicolaou on, 532
- Humoral agents and surgical spaying, enhanced radiation reaction in the vaginal smear by, 455
- Invasive carcinoma passing through the stage of carcinoma *in situ*, probable percentage of, 188
- Individuals, mentally defective, sex chromatin anomalies in, 73
- Intra-uterine death by means of sex chromatin, sex determinations in, 108
- Lavage, diagnostic gastric, the value of  $\alpha$ -chymotrypsin for, 475

- Lesions, benign colonic, cytologic examination of, 148
- Leukemia, vaginal smears in, 370
- Lung cancer, a study of abnormal cells in the peripheral circulation of patients with, 319
- Luteal function, correlative studies between biochemistry and vaginal cytology in the determination of the, 227
- disturbed, the vaginal smear in, 287
- Luteal functions, normal, is the presence of a highly proliferative cell type (estrogenic type) during the second half of the cycle incompatible with, 302
- Luteal phase, can nonatrophic menopausal smear type be differentiated from cell types normally occurring during the, 297
- of the normal menstrual cycle, the vaginal smear during the, 282
- significant for progestational effect, is the occurrence of cytolysis during the, 295
- Malakoplakia, the urinary sediment cytology in a case of, 471
- Malignancy, transformations in relation to, 400
- Menstrual cycle correlative studies of cytology in vaginal smears and endometrial histology during various phases in, 309
- Menstrual cycle, normal, the vaginal smear during the luteal phase of the, 282
- Mentally defective individuals, sex chromatin anomalies in, 73
- Mounting and preserving histological and cytological specimens, a new method for, 237
- Normal and neoplastic cells, cultured, functional capacities of, 402
- Oral malignancies, common and uncommon, the cytology of, 348
- Ovarian cancer by cul-de-sac aspiration, screening for, 492
- Papanicolaou, George Nicholas, May 13, 1883-February 19, 1962, 483
- Papanicolaou technic and the acridine-orange fluorescence method, a comparative study of, 551
- Papillomas and intra-epithelial carcinoma of the urinary bladder, exfoliative cytology of, 255
- Polymorphonuclear neutrophil leukocytes, sex dimorphism in, 13
- Pregnancy late and pregnancy at term, a study of vaginal smears in, 365
- vaginal cytology during the final weeks of, 359
- Progesterone, endogenous, sources of, 211
- in the ovarian cycle, role of, 215
- Progestins, metabolism of, 213
- Progestogens, effect of, methods other than exfoliative cytology for determining the, 218
- on the atrophic epithelium, the effect of, 231
- on the highly proliferated vaginal epithelium, effects of, 278
- Recurrent carcinoma *in situ* after cone biopsy, management of, 172
- Sex chromatin and sex chromosomes, correlations between, 31
- chromocenters resembling, 95
- content in cells from different organs in the same individual, are there differences in the, 139
- in normal and pathological white blood cells, the occurrence of the, 127
- morphological characteristics of the, 69
- tissue culture and, 84
- Sex chromatins, diagnostic accuracy of the, 98
- in oral smears and peripheral blood specimens, discrepancies in the evaluation of, 103
- Sex chromosomes and sex chromatin, 46
- Sex dimorphism, 13
- Sexing, nuclear or polymorphic, do androgens influence the, 122
- Single X chromosome, origin of a sex chromatin from a, 46
- Skin disease, the cytological approach to, 439
- Smear, the irrigation, accuracy in detection of cervical cancer, 459
- vaginal, by humoral agents and surgical spaying, enhanced radiation reaction in the, 455
- Smears from the reproductive and urinary tracts, evaluation of sex chromatin in, 25
- Sputum and bronchial aspirations by tryptic digestion, cellular concentration of, 447
- specimens, pulmonary alveolar proteinosis, Cytologic and cytochemical observations on, 429
- superheated aerosol induced, a two-year follow up study of 261 patients examined by use of, 409
- Symposium: Cell modulations, maturation and neoplastic transformation, 399
- Technic of Mowry, identification of mesothelial cells by the, 443
- Technics, cytological filtration, 311
- Therapy, progestational, vaginal cytology as a technic for assessment of, 293
- Tissue, embryonic and fetal, sex chromatin in, 61
- Transplantable murine carcinoma cell line 70, chemically induced, 500
- Tryptic digestion, cellular concentration of sputum and bronchial aspirations by, 447
- Tumor cells in blood, differentiation of hematopoietic elements from, 551
- sex chromatin in, 90
- Tumors, mixed mesodermal, of the uterus, the exfoliative cytology of, 373
- Uterine cervix, an international agreement on histological terminology for lesions of, 235
- development stages of *in situ* carcinoma in, 538
- Vaginal smears and endometrial histology during various phases of the menstrual cycle, correlative studies of cytology in, 309
- Vaginal smears of normally menstruating women, effects of 19-nor-steroidal progestogens on the, 305
- Viral transformation in cells, the broad aspects of, 401
